

Paris – December, 2025

Scientific Climate Ratings appointed by Connor, Clark & Lunn Infrastructure to lead climate risk assessment of its infrastructure portfolio

Scientific Climate Ratings is pleased to announce its partnership with Connor, Clark & Lunn Infrastructure (CC&L Infrastructure). Scientific Climate Ratings will support the development and implementation of a comprehensive climate risk framework to help CC&L Infrastructure identify, assess, and manage climate-related risks across its infrastructure portfolio.

Through this collaboration, Scientific Climate Ratings will carry out a detailed assessment of both physical and transition climate risks, analysing CC&L Infrastructure's individual assets as well as its portfolio. The analysis will evaluate potential risks and financial impacts under a range of climate scenarios and time horizons defined by CC&L Infrastructure.

Furthermore, to analyse and compare the climate risk profiles of prospective assets, access to the *climateMetrics* analytics platform will be provided, complementing the Climate Risk Ratings delivered by Scientific Climate Ratings on existing assets.

As a long-term steward of client capital, CC&L Infrastructure is committed to responsible investment and proactive climate risk management. This collaboration with Scientific Climate Ratings reflects the firm's ongoing dedication to enhancing its management of climate-related risks in support of resilient, long-term value creation.

About Scientific Climate Ratings:

Scientific Climate Ratings is an independent rating agency within the EDHEC Business School venture ecosystem. We provide science-based, forward-looking ratings to help investors and corporates assess the financial materiality of climate risks and drive effective decarbonisation and resilience strategies. Leveraging EDHEC's award-winning expertise in climate finance, Scientific Climate Ratings delivers transparent, standardised assessments covering over 6,000+ infrastructure assets across 25 countries, with coverage to expand to 5,000+ listed equities by 2026. Our ratings enable the financial community to quantify and manage both physical and transition risks - setting a new global benchmark for climate risk assessment.

About Connor, Clark & Lunn Infrastructure:

CC&L Infrastructure invests in middle-market infrastructure assets with attractive risk-return characteristics, long lives and the potential to generate stable cash flows. To date, CC&L Infrastructure has accumulated more than C\$7 billion in assets under management diversified across a variety of geographies, sectors and asset types, with over 100 underlying facilities across over 35 individual investments. CC&L Infrastructure is a part of Connor, Clark & Lunn Financial Group Ltd., a multi-boutique asset management firm whose affiliates collectively manage approximately C\$167 billion in assets.
